

Мировая андрология онлайн / World andrology online

Дайджест мировых публикаций

Digest of international publications

Сегодня цифровые технологии обеспечивают реализацию одного из главных принципов обмена информацией — быстрого доступа к ней. Для этого мы и создали раздел со ссылками на актуальные научные статьи и предстоящие всероссийские и международные события.

QR-код (QR — Quick Response, «быстрый отклик») — это двухмерный штрихкод (бар-код), предоставляющий информацию для быстрого распознавания с помощью камеры на мобильном телефоне. Нужно лишь установить мобильное приложение, и мировая андрология будет в ваших руках.

In the modern times, digital technologies provide the basis for the main principle of information exchange: quick access. For this purpose, we created a section with links to currently important scientific articles and future Russian and international events.

QR code (QR — Quick Response) is a 2D bar code containing information for quick recognition with a mobile phone camera. After installation of the app, worldwide andrology will be at the tips of your fingers.

No evidence of severe acute respiratory syndrome-coronavirus 2 in semen of men recovering from coronavirus disease 2019
